PROTECTION OF ITALY

The Association of Italian Academics in China (AAIC) and the China-Italy Chamber of Commerce (CICC) are delighted to invite you to the event “*Digital Innovation: The Italian Experience*” (DIT). The aim of the DIT will be the gathering of experts from the worlds of industry, academia, applied technology, and human resources for a half-day thorough discussion and debate about the challenges and opportunities in the fields of IoT, AI, Machine Learning, and Big Data.

Please join the speakers, and the final panel to deepen our understanding of the perspectives offered by the fast-growing progress of the digital technologies. There will be also substantial focus on the implications of the expedited progress of these technologies regarding managerial decision making, investment opportunities, and an exploration of what will be the skill sets to be developed to meet an ever-changing labor market demand and supply. We will explore recent trends in the demand of training, skills and competences which will serve companies, managers, and employees to face the fast-moving job market. Specific attention will be finally reserved to the examination of the implications for industrial organizations, resource management, and human capital within a landscape of technological progress and convergence.

We are really looking forward and will be delighted to seeing you participating at this event. Please come to share your ideas, perspective, to enrich our community’s knowledge on what we believe is one of the most interesting and exciting dimensions of technological change for the years to come.

Best Regards,
AAIIC, and CCIC

LANGUAGE: All the event’s activities will be held in English

PARTICIPATION

AAIIC and/or CCIC members: RMB 200 if [online form registration](#). RMB 300 for registration at the door.

Non-members AIIIC and/or CCIC: Respectively, RMB 500 or RMB 600.
